LEGION BUYS LYCEUM; STARTS REPAIR WORK

At a meeting of Bucktail Post, American Legion, Monday evening March 17th arrangements were made for the funeral of Earl McCarthy, who died in Olean Sunday.

The deed to the Lyceum arrived the latter part of the week from John Quirk, owner, who is in Florida, the price being $2500.00 a very small sum considering the value of the building.

A number of Legion members are at work this week, at the renovating and repairing of the building. Among the many improvements to be made are the cleaning and remodeling of the heating system, preparing for plastering, buying new seats to replace old ones, repairing the wiring below and rearranging that on the stage, and repairing the scenery.

The program seems to be a full one but "Many Hands Make Light Work" and the Legion members are pitching in with a will, in a very worth-while undertaking.

INTERSTATE FACTORY NOW BUILDING FOURTH OVEN.

The fourth oven is now being built at the Interstate Window Glass factory, the three which are now in use not being sufficient to handle easily the quantity of glass produced. Three men are working on it at present, and as soon as the bricklayers are through at Kane, a larger force will be put on to rush the work to completion.

The full force of cutters are at work at the factory and they are kept very busy cutting the glass that is now being made, the quality this year is unusually fine. When the new oven is completed, two more splitters, three flatteners, three shell boys and three loir tenders will be employed.

NUNUNDAH CAMP FIRE HOLDS CEREMONIAL.

Sunday, March 16, was the 12th birthday anniversary of the Camp Fire, and was fittingly observed by a ceremonial meeting at the Wright House in the afternoon. Each member invited guests and delicious refreshments were served; the decorations being those suitable to St. Patrick's Day. Miss Lena Southworth, guardian of the Camp Fire was present at the meeting.

CHIMNEY BURNS OUT; ATTRACTS SPECTATORS.

The burning out of a chimney on the Wright House, early Tuesday evening alarmed a few passersby, but caused no serious damage, as it was soon discovered by John Hull and the fire which had started around it extinguished.

NEW RESTAURANT IN WRIGHT HOUSE.

Mrs. Lizzie Knickerbocker of the firm of T. E. Bailey & Co., has made arrangements with the owners of the Wright House to rent the three front rooms, for the purpose of opening a restaurant this spring. Mrs. Knickerbocker made many friends during the time she assisted in the Bailey grocery and no doubt will be successful in her new enterprise.

LOW BIDS FOR MT. JEWETT HAMLIN ROAD $209,720.

Harrisburg, Pa., March 17.— Bids on 17 highway construction projects aggregating approximately 52 miles were opened today by officials of the department of highways. Included in the projects were sections on the William Penn Highway in Allegany and Westmoreland counties, the Lincoln highway in Chester county and the Lackawanna trail in Lackawanna county. Awards will be announced later. The low bidders were:

Delaware county,—17,704 feet Newton and Edgemont townships, Ambler-Davis company, Philadelphia, $137,795 1,167 feet of grading and drainage in Springfield and Nether Providence township, Vincenzo Di Francesco, Llaneris, $24,938.

FOR RENT—Three furnished rooms with free gas. Telephone Mrs. A. Schoonmaker. adv2t.

WOMEN'S FOREIGN MISSIONARY SOCIETY HELD INTERESTING MEETING TUESDAY.

The March meeting of the Women's Foreign Missionary Society of the Methodist Episcopal church was held Tuesday evening at eight o'clock. At the business meeting plans were made to put on a light opera "Savageland" shortly after Easter. The committee is Mrs. J. M. Wiant, Mrs. E. E. Bouton, Miss Martha Colegrove, Mrs. E. E. Drake, Mrs. Earl Gallup, Miss Carrie Day.

The review of Chapter IV, Creative Japan, was given by Mrs. Arvid H. Bengs and Mrs. E. E. Bouton sang "I know a lovely garden and "The Lilac Tree."

Following a social hour refreshments were served by Mrs. C. W. Freeman, Mrs. J. M. Wiant and the Misses Jennie Biever and Octavia Raymer.

M. E. B.B. TEAM DEFEATS SILK MILLS.

In a game played at East Bradford Saturday evening, March 15th, between the M. E. basketball team of this place and the Silk Mills of Bradford, the Smethport players were victorious, the score being 25 to 20 in their favor. The next game will be played at Bradford, Saturday evening, March 22nd, between the M. E. Basketball team and the High Y's of Bradford. The game will take place at the Y. M. C. A. Building.

CATCHES HAND IN WRINGER OF MACHINE

Patsy Corsi, the 10-year-old son of Mr. and Mrs. August Corsi of 131 Elm street, met with a serious accident yesterday while he and another boy were playing with the electric washing machine, located in the Corsi home which is back of Mr. Corsi's grocery store.

Patsey and another lad connected the machine with the electric current and were engaged in playing with it when the shrill screams of Patsey brought his father to his side from the store. The father was horrified to see his son's left hand caught in the rollers of the machine which was crushing the hand and drawing the arm within its clasp.

Mr. Corsi hurriedly shut off the current and then started with the assistance of Tony Dodaro to extricate the hand from the machinery, which was a most difficult feat. Some time was required to liberate the arm and in the interim, the boy suffered excruciating pain from the imprisoned hand.

Finally the machinery was taken apart and Patsey was taken in Tony Dodaro's taxi to the hospital.

It is not beleived that the bones of the hand are broken but the hand is badly crushed.—Bradford Star-Record, March 17.

STOCKHOLDERS MEETING.

The Stockholders' meeting of the McKean County Fair will be held at the Secretary's office, Smethport, Pa., at 1 o'clock P. M. March 24, 1924. H. J. RICE, Secy.

POTATO CLUB BOYS WANTED

A large number of the Conopus Club members have signed contracts pertaining to the Smethport Disease Free Potato Club and are now looking for some good boys and young men who would like to grow potatoes for a good financial return.

Any boy in the vicinity of Smethport between the ages of ten and eighteen years, inclusive, is eligible to become a member of the Smethport Disease Free Potato Club Each boy will be furnished with two and a half bushels of potatoes of the best quality that money can buy and in return are supposed to return to their sponsor, a Conopus Club member, five bushels of table stock potatoes. If the two and a half bushels are well cared for they ought to produce from twenty-five to thirty-five bushels of potatoes. This would give the club member from twenty to thirty bushels of good potatoes for his labor in growing the crop. Financially this is a good thing. This piece of work also will prove to the farmers of Smethport the value of good seed and encourage them to use seed from the potatoes grown by the club members. At harvest time there will also be a show and banquet for the club members and their sponsors, prizes being awarded for the best potatoes exhibited.

Any boy in the vicinity of Smethport, farmer or town boy, who may be interested, please call at the Farm Bureau office where you will leave your name as a member of the club.

DR. MEEKER TO SPEAK AT CONFERENCE

On March 26th a statewide safety conference will be held in the Hall of the House of Representatives, for the Employers and Employees of Pennsylvania.

A very interesting program has been arranged, the address of welcome being by Governor Pinchot, followed by Lessons to be Derived from Pennsylvania's experience by Dr. Royal Meeker, Sec'y of Labor and Industry, and talks by the executives of numerous establishments. Dr. Meeker is a brother of G. W. Meeker of this place, and has visited here several times.

The meeting comes as a climax to a state wide program evolved by Commissioner Royal Meeker, of the labor department, to reduce the ever growing list of accidents in the industrial plants. Pennsylvania in common with other states of the union, has experienced an upward trend in the number of accident that maim, kill and incapacitate the members of the employe group. Several meetings have been held in the larger cities of the state in the effort to awaken employees and employers alike to the need of observing the utmost caution in their daily work.

UNION LEASES WORKS.

The Handblowers' Union recently leased the Interstate glass plant at Huntingdon, W. Va., and will carry on the work, the members of the Union being the employes.

School Library Important Adjunct to the Town

One of the community interests that attracts little attention is the school library which contains over three thousand volumes of juvenile and adult fiction, history, poetry, biography and various other reference books. This library was made possible through a gift to the school board of five thousand dollars from the Hon. B. D. Hamlin in 1892. This money is invested in bonds and the proceeds used for the upkeep of the library which is free to all students of the borough school. Any one can borrow books by a payment of five cents a week a volume and, through the library, any one can borrow reference books from the Free Library Commission at Harrisburg.

The increasing cost of books has greatly lessened the number of volumes that can be purchased yearly and somewhat handicapped the usefulness of the library, as the life of a busy library book is brief. Within the past year, several interested patrons have presented the library with a number of volumes of adult and juvenile fiction.

This is much appreciated and this article is written in the hope that others may become interested and contribute books that they have read and enjoyed in order that others may read and enjoy them.

Then, too, borrowed books are not always returned even to libraries and there are doubtless many long-forgotten books belonging to the library that should be returned by the borrowers.

The library is open Tuesday and Thursday afternoons from four to five o'clock and Saturday afternoons from three to five o'clock and visitors are always welcome.

CHAS. MONTILLEUR HURT.

Chas. Montilleur, expert electrician cut a deep gash in his left temple, late Friday evening as he was coming down the hill past the Swedish Mission Church. He stepped on a treacherous piece of ice, covered with snow, and pitched forward, hitting his head with such violence that he was unconscious for ten or fifteen minutes. Whe he regained consciousness he was lying in a pool of blood from a deep cut on his forehead. He proceeded to his rooms where his wound was cared for. At present he is much improved and able to carry on his work.

ARREST SUSPECT IN TRIPLE MURDER.

Batavia, March 18.—Arrest of a suspect was made last night in the triple Linden murder of March 11, in which Mr. and Mrs. Thomas Whalley and Mrs. Mabel Morse were killed in the Whalley home.

The man under arrest is John Vetoski, twenty-five years old, who worked on a farm conducted by Broadbrooks & Sirk, about seven miles from Linden. He was known as John Smith and worked as a farmhand from February 10 to March 11. He has a long police record and was out on parole from Dannemora prison hospital where he was sent for insanity from Sing Sing prison.

Vetoski was arrested near Perry by Sheriff Simons of Warsaw county. He is being held in the Wyoming county jail until to-day when he will be brought to Batavia for questioning.

MRS. T. W. CAMP TAKES BAD FALL.

Sunday, March 9th as Mrs. T. W. Camp was putting away dishes in the top of her cupboard, she slipped from the ledge on which she was standing and fell between the chair and the cupboard to the floor. Her daughter, Mrs. M. M. Pomeroy, who was in the house, called Dr. Hamilton, who found that no bones were broken, but she was badly bruised and shaken up, so that for several days she was unable to be about the house.

MAN BADLY CUT AT WINDOW GLASS FACTORY

Last Thursday Elmer Crawford, who is employed at the Interstate Glass Factory was badly cut while tending lehr by a sheet of glass which broke and cut him under the chin. He was cared for by Dr. Chadwick who found it unnecessary to use any stitches.

SMALL BOY SHOT IN HAND.

The five year old son of Mr. and Mrs. F. G. Miller who lives on a farm in Keating township was accidentally shot through the hand Wednesday evening, March 19th, by a 22 rifle which had been used to shoot skunks.

The gun which had been laid aside was still loaded, and was accidentally discharged by another boy The little patient had his hand dressed by Dr. Burg Chadwick, it is thought that it will heal without any trouble

EARL McCARTHY BURIED WITH MILITARY HONORS

Earl McCarthy, son of Mr. and Mrs. Chris McCarthy (deceased) passed away from tuberculosis, Sunday, March 16th at the home of his sister, Mrs. John Judge of Olean.

He was born in Smethport, October 4, 1888 and spent the greater part of his life here.

The young man was a world war veteran, having enlisted and served over seas, 18 months. He had been wounded in action having the fleshy part of his left leg shot quite badly.

It is supposed that during his experience over seas he contracted the disease from which he died, although he was not in a serious condition until the last two months. He had been employed at Salem, New Jersey, and was brought to his sister's home 10 days before his death.

He was well known here where he has many friends.

He is survived by three brothers Howard, Cal and Robert of this place, and three sisters, Mrs. John Judge and Alene Macarthy of Olean N. Y., and Clare McCarthy of Buffalo, N. Y.

The body was brought here for burial and funeral services held at St Elizabeth's church at 9:00 o'clock a. m. Tuesday March 18th, Rev. P. J. Donohue officiating. He was buried with full military honors by the Bucktail Post, American Legion, which attended the funeral in a body. Taps were played and a salute fired at the grave.

Interment was in St. Elizabeth's cemetery. Those from out of town who attended the funeral were: Wm. Kirk, Johnsonburg, Pa. Martin Judge, Olean, N. Y. Mrs. Wm. Greenalch, Grace Greenalch, Mrs. L. Sheley, and Mrs. Wm. Pendergast of Brookwayville, Pa.

E. G. Potter Gives Address

District Attorney E. G. Potter gave an interesting talk Saturday P. M. on "Law Enforcement" at the Guest Day meeting of the Travelers Club. Mr. Potter is well fitted to speak on this subject, as his work is daily along these lines. He traced the progress of prohibition from its earliest conception in this country down to the presen day, and stated that while formerly public sentiment had been against the enforcement of the liquor laws, it was steadily becoming more in favor of it, and the mass of the people believed if a law existed, it should be enforced.

At the conclusion of his talk Mr. Potter allowed the ladies to question him on the subject, and many interesting points were brought out.

A large bouquet of pink roses decorated the mantle, and Mrs. L. K. Hogarth, president of the club, stated that this was a gift from the members to Mrs. J. E. Cather, the nightingale of the club, who is soon to leave for her new home in the west. Mrs. Cather, who is a member of the club sextette has been a prominent figure in its musical activities, and will be very much missed.

Delicious refreshments were served at the close of the meeting, by the committee appointed for that purpose.

Conopus Club Shows Progress in the Potato Club

The Conopus Club held a meeting St Patricks day at noon at Munn's restaurant, at which 22 members were present. The prize was won by L. E. Munn.

F. S. Crossman reported that about 15 members had joined the boys potato club, and considerable interest had been shown.

H. H. Redfield, chairman of the Good Roads committee advocated the placing of arrow signs at the cross roads directing the motorist to Smethport.

S. L. Fry, chairman of the Industrial committee reported that Mr. Rafferty, the Bottle Factory representative, had failed to make his appearance.

A committee was appointed to work with the Legion in regard to maintaining the Lyceum.

EARL GALLUP DISTRICT DEPUTY, I. O. O. F.

Earl Gallup of the local post office force has been appointed District Deputy for the I. O. O. F. lodge of McKean county. Mr. Gallup is to be congratulated upon the honor bestowed upon him, and fully merits the position. He was appointed by the grand lodge to fill the vacancy caused by the death of Mr. W. H. Bunce of Kane.

NEW ELECTRIC SUPPLY STORE.

The Keystone Power Corporation of Ridgway has rented the building formerly occupied by J. E. Cather' Little Boot Shop, and will carry a full line of electrical supplies.

BISHOP OVERS PREACHED SPLENDID SERMON ON AFRICA SUNDAY AT St LUKES

Rt. Rev. Walter H. Overs, Bishop of Liberia preached both morning and evening Sunday, March 16th at St. Luke's Episcopal church to a large and attentive congregation.

His sermons dealt in a great part with his work in Africa, where he has been for a number of years, carrying on the work of the church in spite of many hardships. His intimate knowledge of the people and customs of that country made his sermon most interesting.

CROOK CAUGHT IN KANE HAS LONG CRIME RECORD

Chief of Police R. T. Fowler has received the following letter from Harry L. Hulbert, warden of the Michigan State Prison at Jackson regarding the record of Geo. Thompson alias Paul Cullen, arrested here last week for forgery and who is now in the Smethport jail.

"As requested in your letter of Mar. 12, I am inclosing photo and description of Paul Cullen. This man is wanted as a parole violator, so please keep us informed as to the disposition of the forgery case as we can arrange to return him when the Pennsylvania authorities are through with him."

Chief Fowler is also in receipt of a letter from N. S. Oliver, superintendent of the industrial farm at Burwash, Ontario, which came with a photograph of Thompson that identified the man without question.

Te letter says that Thompson was deported from Canada to America on January 31, 1923, while serving one year for escaping from Mimico Clay Plain Prison, Ontario, Canada, and in addition one to two years which he was serving when he escaped from the Mimico Prison. He was deported before his time expired by the Governor General. His criminal record in New York state follows:

In Buffalo—As John Casey, March 10, 191, petty larceny, 10 days in Erie county penitentiary; as Wm. Connors, August 11, 1911, petty larceny, 30 days, same prison; as John Gallapher, January 23, 1912, larceny, six months, same prison; February 26, 1913, eight months, same prison; as John O'Neill, January 18, 1914, six months, same prison.

In Batavia—As John O'Neill, May 15, 1915, pickpocket, six months in Rochester prison; November 3, 1915, larceny of automobile, no disposition.

The charge against Thompson or Cullen in Michigan was for a burglary in Oakland county and on December 10, 1918, he was sentenced to from 4 to 15 years. He was paroled from the Michigan State Prison at Jackson on November 15, 1922, and according to his own story served a year in another Michigan prison for forgery, after he had been paroled.

The Kane police surely put a bad man out of circulation when they nabbed Thompson in this city last Sunday morning.—Kane Republican, March 17.

NOTICE

If any young men wish to attend the Military Training Camps this summer, please notify E. G. Potter, county chairman.

LIST OF JURORS

MONDAY, APRIL 14, 1924.

List of Jurors drawn January 25, 1924, in the Court of Common Pleas of McKean County, to be holden at Smethport, Pa., on the Second Monday of April A. D. 1924, at two o'clock P. M.

Ashbaugh, F. H., Lab. 107 Park Ave, Kane.
Barnaby, Mrs. Earl R., H. W., Sergeant, Pa.
Bolls, Clarence, Lab, Duke Center.
Beckman, Lena, H. W., 14 Bedford St. Bradford.
Bubring, Augusta, H. W., 22 Hemlock Ave, Kane.
Brown, Carl, Lab., Betula.
Carpenter, W. C., Lab., Eldred.
Crandall, A. D., Clerk, 65 Brook St., Bradford.
Crawford, Lillian, Clerk, 43 Congress St., Bradford.
Dickman, A. A., Mcht., Broad St., Port Allegany.
Dennis, R. A., Plumber, 22 Charlotte Ave, Bradford.
Davis, C. C., Bk., Kpr., 112 Dawson St. Kane.
Elandson, C. E., Butcher, Clermont.
Goding, Leo. V., Ins. Agt., Main St. Port Allegany.
Gallup, Bertha, H. W., East Smethport.
Gold William, Lab., 637 Dawson St., Kane.
Headstrom, Victoria, H. W., Lewis Run.
Heim, W. L., Mgr., Kane, 115 Biddle St.
Johnon, Carl H., Lab., Kane, R. D. 1.
Jackson, Minnie, Stenog., 114 Barbour St., Bradford.

Visit the BETTER HOMES EXHIBIT, Bradford, Pa., enjoy the music and see one of the finest displays ever put on in Northwestern Pennsylvania.

Tickets are FREE, if secured from one of the Exibitors, or Phone 1309, Bradford and ask for yours.

Mother's Cook Book

Christianity wants nothing so much as sunny people, and the old are hungrier for love than for bread.

The oil of joy is very cheap, and if you can help the poor with a garment of praise, it will be better for them than blankets.—Henry Drummond.

FOOD FOR THE FAMILY

A SLICE of ham placed over a dish of scalloped potatoes just before putting in the oven makes a tasty and nourishing luncheon dish.

Parsnip Chowder.

Fry two tablespoonfuls of diced salt pork until brown, add two tablespoonfuls of minced onion, cook until the onion is slightly yellow, then add a pint of boiling water, two cupfuls of diced parsnip and one cupful of diced potato. Cook until soft, then add a quart of milk, seasoning to taste, and a few milk crackers, soaked in boiling water before adding to the chowder.

Spring Salad.

Put through the meat grinder a few tender carrots, add a spoonful of grated onion, a little chopped green pepper, a handful of nuts and heap on tender lettuce. Serve with mayonnaise dressing.

Green Cheese.

Take two ounces of parsley, one ounce of watercress and one ounce of celery. Wash and dry the parsley and dry it in the oven. Chop the cress and celery, add the crumbled parsley and mix with four ounces of cream cheese. Season with one-fourth of a teaspoonful of cayenne and salt, mix well, put through a colander and form into small cakes to pass with the salad.

Rhubarb Sherbet.

Take two pounds of rhubarb cut fine, two cupfuls of water, two tablespoonfuls of ginger root chopped, two and one-half cupfuls of sugar. Cook until soft. Add one teaspoonful of gelatin, stir until well dissolved. Strain and cool, add two tablespoonfuls of lemon juice and freeze. This makes two quarts.

Sunshine Bananas.

Cut six bananas into halves and again into halves crosswise. Add three tablespoonfuls of butter and three tablespoonfuls of maple sirup with a little salt. Place in a baking dish in the oven and baste often while baking. When they are soft but still retain their shape, serve at once with cream.

Washington Farmers Will Release Wheat

Farmers in the state of Washington, who still hold 50 per cent of the 1923 wheat crop of 58,000,000 bushels, are preparing to let go, after holding since harvest for a higher price, according to reports reaching the wheat council of the United States. It is reported that one lot of 100,000 bushels of Washington grown wheat was offered on the February market. Sales of Canadian wheat at Vancouver for foreign account total 10,000,000 bushels for the season, double the figure for last sensin at this date.

PENNSY FREIGHT TRAIN WRECKED.

Eight Cars Pile Up Along Track When Train Buckles Near Village of Sizerville.

Traffic was delayed for a time yesterday morning when 8 freight cars were piled up along the right-of-way of the Pennsylvania Railroad, Buffalo division in a wreck six miles from Emporium on Summit Hill at nine o'clock. Passenger trains to Olean, Buffalo and other points were re-routed over the Erie division. The wreck occurred when a freight train "buckled" going down the steep incline, eight box cars leaving the rails and piling up. The train crew was uninjured. The engine and caboose remained on the rails, dispatches claim. The freight was southbound at the time of the accident.

A car of cracked corn went into the stream and another car loaded with beans was so badly smashed that the contents scattered over a big territory.—Potter Enterprise.

LITTLE ELLEN PETRO SUFFERS INJURY TO EYE.

Ellen Petro, three year old daughter of Mr. and Mrs. Dominic Petro of Ridgway sufferen a severely injured eye a few days ago when the knife with which an older sister was sharpening a pencil, slipped and cut the corner of the little tot's eye. It will be unable to ascertain whether the sight can be restored for several days. The child, however, is resting easy at the Elk County General Hospital.—Kane, March 15.

POTTER GAS CO. TAKES OVER GAS AND OIL INTEREST.

The Potter Gas Company has taken over the gas and oil interests of the Interstate Window Glass Co. in Shinglehouse boro., Sharon, Pleasant Valley and Clara township where there are about seventy-five gas producing wells. The consideration is said to be around $125,000. A good number of these wells were drilled by the Palmer Window Glass company. The deal includes the lines and pump station. All this new territory will add considerably to the volume of gas in this part of the country which is held by the Potter company.—Kane, March 15.

TWO TOTS TAGGED FOR RAILROAD TRIP.

Two small boys passed through here yesterday enroute from Falls Creek to Erie. The children were about the ages of 5 and 7 years and were very intelligent. They were tags to designate their names and the place of their destination. Arriving here at 2:35 p. m. they had to remain until 6:45 p. m. and were placed in care of the local ticket agent who tried to induce them to leave the station and go out for supper, but they could not be influenced to leave the depot, probably having received strict instructions from relatives.—Kane, March 15.

LAFAYETTE.

County Commissioner Wm. Hilpenny of Smethport was a business visitor in town, Thursday.

L. K. Hogarth of Smethport was in town between trains, Thursday.

Dr. Ackermann of Olean was a business visitor at the D. C. Young farm, Thursday evening.

David Arnot of Rew City is a guest of his sister, Mrs. Eugene Haynes.

J. T. Haynes was a business visitor in Olean, Wednesday.

Miss Lillian Childs is a guest of her aunt, Mrs. Webb Hull, of Buffalo.

H. J. Rice of Smethport was in town between trains Saturda.

Miss Ruth Carpenter was a guest of relatives in Ceres, Saturday. She was accompanied home by her niece, Miss Zellabelle Carpenter.

Miss Lois Pendleton and brother, Leslie, were guests of their grandparents, Mr. and Mrs. W. O. Carpenter, Sunday.

Patrick Lindsey of Bells Run spent Sunday with Mr. and Mrs. Wilber Lawton.

Mrs. Coyle and daughter, Miss Twila Bradt of Bullis Mills, were guests of rs. Louis Coleman, Monday.

Oscar Carpenter of Fiker, Kentucky, is a guest of featives in this vicinity.

Glenn Appleby was a week-end guest of relatives in Bolivar.

Theodore Raszmann was an Olean visitor Saturday.

Wilbur Oviatt of Semthport was a business visitor here, Thursday.

Miss da Comes is ill with quinsy.

Miss Clara Goodyear is a patient at the Mountain Clinic, Olean.

n Lawrence Gerrity was a week-end guest of his brother, John, who is a patient in St. Vincent's hospital, Erie, Pa.

Miss Louise Ireland of Eldred called on Mrs. Raymond Raszmann, Firday afternoon.

Mr. and Mrs. Bruce Stull of Indian Creek were guests of Mr. and Mrs. F. D. Pendleton, Friday.

Mr. and Mrs. Henry Reed of Eldred, spend Thursday evening with Mr. and Mrs. Vird Dennis.

Mrs. Eros Carpenter was a business visitor in Olean, Saturday.

Mrs. Margaret Goodyear, Mr. and Mrs. John Carlson, and Mr. and Mrs. Frank Shick visited Miss Clara Goodyear at the Mountain Clinic, Olean, recently.

Mr. and Mrs. E. A. Guenter and children of Coryville were in town Saturday.

The Farmers Club met at the home of Mr. and Mrs. Vird Dennis Friday evening. A hat trimming contest for the men provided considerable amusement — for the ladies. And much interest was taken in the question box which followed. Those who were present from out of town were Claud Donahue and sister, Miss Edna, and Miss Welch, of Indian Creek.

Mrs. Ada Young of Smethport, who is a surgical patient at the Women's Hospital, Buffalo, has many friends in this vicinity who are deeply grieved to learn of the extremely serious turn her condition has taken.

Radio Craze Affects 2,000,000 Britishers

More than 2,200 miles of aerial wire have been erected in Great Britain in the last twelve months, so much has the radio craze seized the public. It is estimated by officials of the British Broadcasting company that 2,000,000 people are entertained daily at a cost of a farthing each.

The company claims that wireless has stimulated industry considerably. It has necessitated the opening up of a new subhead in the directory for "wireless supplies dealers."

Five hundred thousand dollars has been paid to the entertainment industry in salaries, fees and copyright royalties, and large numbers of engineers and studio staffs are given employment at the various sending stations.

Sugar From Bulrushes

German and Austrian scientists have come forward with the statement that bulrushes and certain other kinds of water grasses and reeds contain sugar, and possibly in sufficient quantity for commercial use. A content in some cases as high as 25 per cent is mentioned. Plans are in hand to start a factory.

PUBLIC FISHING NOTICE.

Notice is hereby given that acting under the provisions of the Act of July 28, 1917, P. L. 1215, and its supplements, all streams and their tributaries within the confines of State Game Refuge No. 20, located in Norwich Township, McKean County, including part of Indian Run, portions of Haven's Brook and Long Hollow Run, are hereby set aside as nursery steams and closed to fishing for a period of five (5) years commencing, April 15, 1924. (The Commissioner of Fisheries reserves the right to exercise the authority granted him under Section 210 of the above mentioned Act.)

Fishing is prohibited at all times of the year.

Penalty for violation of the above one hundred dollars ($100.).

N. R. Buller,
Commissioner of Fisheries.

POLITICAL ANNOUNCEMENT

FOR MEMBER OF ASSEMBLY.

I hereby announce my candidacy for the nomination of the Republican party for Member of Assembly for McKean County subject to the decision of the Republican Electors at the Primary to be held April 22, 1924.

THOMAS B. WILSON

Bradford, Pa.

EDITORIAL

THE SECRET OF FORD'S SUCCESS.

Ford has figured out another way to save money. He is building double-decked boxcars so he can ship his autos "two deep." They say it'll save him $6 every time he ships a Ford car this way.

We found this item buried on a financial page. It doesn't get as much attention as Henry in politics, for instance. But it struck us as typical of what has "made" Hennext to nothing at all, to the world's richest man.

Six dollars on every Ford car would give him in a year as many millions as he has fingers and thumbs.

A LEVEL-HEADED PRESIDENT.

President Coolidge has been frequently characterized as taciturn, level headed, conscientious and thorough, but these traits were never so appreciated and so welcomed as since the bursting of the Teapot Dome bubble. When life politic moves along with placid surface the conservative and sane is rebuked for donothingness, but when violent eruption bursts that placid surface a Chief Executive who can retain his equanimity and composure will be recognized as the nemesis of the self-seeking politicians and the Messiah of the people.

The vim with which the Democrats made campaign capital of the oil reserve disclosures was appalling, but by its very intensty betrayed a lack of sincerity and commendable purpose. The politicians in opposition to the Republican regime exposed the scum of he navy oil for personal ends. President Coolidge for public ends is forcing an investigation beneath the scum. One puff of the breath of scandal bares more personalities and political ambitions than a score of political campaigns. Under the threat of scandal and disgrace the guilty denies, the ambitious politician becomes a haranguing and accusing opportunist and the true representative of the people reveals himself as the faithful public servant. Of such as this latter has President Coolidge proven himself.—Beatrice (Nebr.) Express.

TOWNSHIPS AND TOWNS PRACTICALLY ALL READY FOR TUBERCULIN TEST.

According to reports filed by the different township chairmen at the Farm Bureau Office to date practically are ready for the testing of their cattle. Some townships are short of the signatures of 90% of their cattle owners but this is mainly due to the difficulty in getting over their territory.

The honor roll of the townships and towns to date is as follows:

Township	No. herds Signed	No. cattle Signed	%	No. herds Unsigned	No. Cattle Unsigned	Total No. herds	Total Cat.
Keating	153	939	98	3	16	136	952
Annin	74	819	90	9	63	83	882
Liberty	176	1234	99	2	12	178	1246
Pt Allegany B.	56	102	100	0	0	56	102
Sergeant Twp.	38	248	90	4	14	42	262
Norwich	93	382	98	2	9	95	391
Hamlin	111	580	93	33	93	119	673
Wetmore	178	821	99	2		180	821
Lewis Run	36	44	100	0	0	36	44
Mt. Jewett	37	108	93	3	7	40	111

The more prompt we are in getting in our reports the more sure we are of a yearly test. For otherwise the money might become exhausted. Let us co-operate to hasten the signing of the application blanks.

Under the direction of E. A. Studholme the different chairmen of transportation are now working and much assisance can be given them, if anyone who will volunteer to take each veterinarian for a day around to the farms will only notify their township chairman of the same.

C. F. SCHWAB AND J. G. PAUL DROPS OUT OF CONTEST.

The Herald is authorized to state that Charles F. Schwab and James G. Paul, both of Bradford, announced candidates for the position of delegates to represent this congressional district in the national Democratic convention to be held in New York city, have both withdrawn from the contest.

Mr. Paul was the first to announce his candidacy and after Mr. Schwab entered the lists. There was a prospect of an interesting local contest for the place and some friction, perhaps, in party affairs in this county.

Conferences were held and it was decided in behalf of the interests of the party as an organization, that both men should pull out of the running and this was done.

It is understood that there shall be no McKean county candidate for Democratic national delegate during the present campaign. The fight for the honor will be between Center and Clearfield counties, where two men, one in each county are candidates.—Bradford Sunday Herald, March 16.

BASKETBALL FRIDAY NIGHT AT LYCEUM

A real basketball treat is coming to the fans of Smethport, March 21, when the Trojans of Bradford invade the county seat for a return game with the Spark Plugs. The Trojans swamped the Spark Plugs in Bradford last months but they are in for a hard battle on the Lyceum floor Friday night. Poor teamwork due to the lack of practice, spelled defeat for the Spark Plugs in the game at Bradford, but an effort is being made to overcome that fault this week.

P. J. Mundy, lanky center and captain of the Spark Plugs will start at the pivot position for his team. Mundy has not been outjumped by an opposing center this season, and a real exhibition is promised when he stacks up againg Hinchy, ex-Brad-Ford star or Nellis, regular Trojan center. Max Smith will play one forward for the Spark Plugs, with "Red" Halpenny or "Ev" Mundy for a running mate. Irving and Kohn will start in the guard positions with Iddings in reserve.

The Trojans will probably line-up with Hinchey or Nellis in the pivot position, Locke and Foote, forwards and Rizzuite and Goodman guards.

A fast preliminary is scheduled between the Coleby Sports and the local "Shrieks." The preliminary will start at 7:30 and the main attraction will be caled after the finish of the first game.

CHURCH SERVICES AT FIRST BAPTIST CHURCH

Prayer meeting Thursday evening at 7:30 P. M. Next Sunday's lessun will be discussed. Look over your lesson and come prepared to take part. Rev. S. A. Renicks is in Pittsburgh attending a convention this week. We specially need your help in his absence. Rev. Renicks will preach Sunday morning at 10:30 A. M.; Sunday School 11:45 and preaching service Sunday evening 7:30 P. M.

The Man Knows.

Mrs.—What is this entente cordiale I hear about?

Mr.—Oh, it's one of those fancy drinks they have over in France.

Take That.

Customer—How much are your four-dollar shoes?

Clerk—Two dollars a foot.

CARD OF THANKS

We desire to thank our friends and neighbors for acts of kindness rendered during our recent bereavement in the death of our son, Floyd Pettis.

Mr. and Mrs. James Tammany

SHOE REPAIR SHOP.

I have bought the shoe repairing outfit belonging to J. E. Cather and will continue to carry on the business at my own home 309 E. Main street. John McCarthy.

NOTICE

Anyone having puzzles or games they care to give away, please notify Mary McCabe, Community Nurse, as she can use them for her shut-in patients.

March 17, 1924, when bids will be publicly opened and scheduled and contract awarded as soon thereafter as possible for the reconstruction of 19984 linear feet of either bituminous surface course on a concrete foundation or one course reinforced concrete pavement, 18 feet wide, being situated in Mt. Jewett Borough and Hamlin Township, McKean County on Route No. 95. Bidding blanks and specifications may be obtained free, and drawings upon payment of $2.50 per set, upon application to Pennsylvania Department of Highways, Harrisburg. No refund for drawings returned. They can also be seen at office of Pennsylvania Department of Highways, Borton Bldg., 132 Seventh street, Pittsburgh, and Franklin Trust Co. Bldg., Franklin, Pa. and 1007 Commerce Bldg., Erie Penna. P. D. Wright, Secretary of Highways.

adv. 21, 28, Mar. 6.

FOR SALE—Canary bird outfit in double breeding cage, 2 fine females. Write to 501 Main street. adv 2t**

SHERIFF SALE.

By virtue of Sundry Writs of Fieri Facias and other writs, issued out of the Courts of Common Pleas of McKean County, Pennsylvania and to me directed, I will expose at public sale on the premises in the Borough of Port Allegany, McKean County, Penna., on Thursday, April 10th at 2:00 o'clock P. M.

All that piece of land situate in Port Allegany Borough, County of McKean and State of Pennsylvania, bounded and described as follows, to-wit:

BEGINNING at a post in the South line of Catlin Street, being the Northwest corner of a lot deeded by C. A. Dolley to William Ackerman; Thence along the South line of Catlin Street, South 58 degrees West, sixty (60) feet; Thence South 30 degrees east, 131.2 feet to the North line of a reserve; Thence North 58 degrees East, sixty (60) feet to the Southwest corner of said lot of William Ackerman; Thence along the West line of same North 30 degrees West 128.6 feet to the place of beginning.

Being part of lots Nos. 7 & 8 as laid out on the plot of lands of S. W. & W. E. Smith in Port Allegany Borough.

Being improved and having thereon one two story frame dwelling house.

C. W. CATLIN,
Attorney for Plaintiff.

SHERIFF'S OFFICE.
L. W. BARTON, Sheriff.
Smethport, Pa. March 17, 1924.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC.

Required by the Act of Congress of August 24, 1912.

Of McKean County Miner, published weekly at Smethport, Pa., for April 1, 1924.

State of Pennsylvania, County of McKean, ss.

Before me, a Prothonotary in and for the State and county aforesaid, personally appeared Mrs. H. L. Backus, who, having been duly sworn according to law, deposes and says that she is the owner and publisher of the McKean county Miner, and that the following is, to the best of her knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, and business manager is:

Publisher, Mrs. H. L. Backus, Smethport, Pa.

Editor, Mrs. H. L. Backus, Smethport, Pa.

Business Manager, Mrs. H. L. Backus, Smethport, Pa.

2. That the owner is: Mrs. H. L. Backus, Smethport, Pa.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

Mrs. H. L. Backus,
Owner and Publisher.

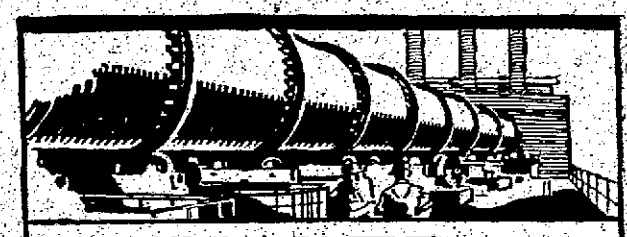
Sworn to and subscribed before me this 7th day of March, 1924.

B. F. STARSKY,
Prothonotary.

My commission expires on the 1st Monday of January, 1928.

BIDS OPEN

Pennsylvania Departments of Highways, Harrisburg, Pa., Sealed proposals will be received at the State Capitol until 10 a. m. March 31, 1924, when bids will be publicly opened and scheduled and contracts awarded as soon thereafter as possible for the reconstruction of 11900 linear feet of Either bituminous surface course on a concrete foundation or One Course reinforced Concrete Pavement, 16 feet wide, being situate in Otto Township, McKean County, Appl. No. 2809 on Route No. 211. Bidding bolnks and specifications may be obtained free, and drawings upon payment of $2.50 per set, upon application to Pennsylvania Department of Highways, Harrisburg. No refund for drawings returned. They can also be seen at office of Pennsylvania Department of Highways, Harrisburg, Borton Bldg. 69h and Market Streets, Philadelphia, 551 Century Bldg. 132 Seventh Street, Pittsburgh, and Commerce Bldgs., Erie, Pa., and Franklin Trust Co. Bldg., Franklin, Pa., P. D. Wright, Secretary of Highways. adv 6-12-20



CHEAPER than 30 years ago

One reason concrete is used so generally today in all types of construction from sidewalks to highways, from garages to enormous industrial plants, is the fact that Portland Cement actually costs less than it did thirty years ago.

The Atlas rotary kiln, daily producing as much as the old-time kiln did in one month, was the greatest single factor in assuring this cheapness.

And your building material dealer, the only distributing channel between Atlas and you, assures distribution economy. He knows building and building materials. He can help you.

PERSONALS

Mrs. W. S. Palmer entertained a number of young girls Monday evening at cards in honor of her daughter Pauline's twelfth birthday anniversary.

The Married People's Club held a dance Monday evening in Quirk's hall.

The Five Hundred Club held a St. Patricks Day party Monday evening, in the Traveler's Club House, each member bringing two guests.

Mr. and Mrs. H. H. Redfield and daughter Louise returned Monday from New York City, where they spent last week.

Thos Linsey, Oscar Spencer, Thomas Gleason, Wiley Reed and Luther Conroe of Bradford were in town Sunday calling on friends.

Mr. and Mrs. W. W. Barnum have rented the house owned by H. C. Wells on Rose Hill avenue formerly occupied by J. E. Cather and family and are moving their household goods this week.

John McCarthy who conducts a shoe repairing shop on East Main street is having his house wired for electricity, G. S. Riley, electrician is doing the work.

Mrs. Mary Forrest was a Bradford visitor Saturday.

Mrs. Thos. H. Morrison who has been the guest of Mrs. Terrett of Rochester for short time, returned last week to her home in this place.

Miss Naomi Comes, stenographer for W. H. Gallup has been granted her commission as notary public.

Read Well's new ad in this issue of the Miner.

The Women's Christian Temperance Union will meet with Mrs. J. B. Oviatt, next Tuesday March 25 at 2:30. A good attendance is desired.

S. D. Metzgar, who has been very ill with pneumonia, is able to be out again, which is pleasing news to his many friends.

Mr. and Mrs. Geo. King are moving into their new home on the corner of Main and Hill streets.

Miss Mate Connolly returned to her home here Tuesday after a visit with Mr. and Mrs. O. J. Wetrick of Coudersport, Pa.

Carl Carlson of Akron, Ohio is the guest of Mr. and Mrs. J. A. Johnson.

M. E. Campbell of Wellsboro, Pa. was a business visitor here Tuesday.

Mr. and Mrs. A. T. Alexis of Johnsonburg spent the week-end with Mr. and Mrs. F. Larson.

Miss Minnie Willey of Arcade, N. Y., is the guest of Mr. and Mrs. F. A. Green.

Mr. and Mrs. Chas Clark of Bradford were visiting friends here Friday.

Meyer Zafron left Tuesday for Buffalo, N. Y., on business.

Tom Hungiville of Johnsonburg spent the week-end in town with his family.

N. W. Nunnemaker of Bradford was a business visitor here Thursday.

A. G. Christie of Reynoldsville, spent Friday in town.

O. J. Hamlin is in New York City this week on business.

Daniel Bacon, and R. P. Yerdon returned Friday from Jamestown, where Joseph Yerdon, who recently had one leg amputated underwent a similar operation last week and had his other leg removed.

Mr and Mrs R. L. Hull were Bradford visitors Saturday.

Mr. Oliver of Jamestown, N. Y., was in town Friday on business.

R. P. Yerdon of E. Main street has purchased a Reo Sedan.

Judge Bouton left Sunday for Philadelphia to hold court.

Forest Abbey and Herbert Larson were Olean visitors Monday.

Misses Eva Ripley, Alice Ferman Katheryn Slagle, and Clara Oviatt were in Bradford Monday evening.

Mrs. Jay Bloomster of Colegrove was in town Monday.

H. B. Musser of State College was a business visitor last week.

Dy Racey of Eldred was in town Monday.

The Civic Improvement Club of East Smethport, Pa., held a St. Patricks party at H. Jackobson's Monday Evening.

Mr. and Mrs. J. E. Cather, and children leave Thursday for Casper Wyoming.

Walter Roberts of Bradford was a guest of friends here Monday.

Miss Mildred Johnson of Port Allegany is a guest of relatives here.

Mary McDermott was taken to the Bradford hospital Tuesday afternoon to undergo an operation for appendicitis.

Miss Helen Ford of Port Allegny is the guest of Harriet Herzog.

W. H. Halpenny was a Mt. Jewett visitor Tuesday.

Mrs. Jane Young underwent a second operation at the woman's hospital of Buffalo Friday. At this writing she is getting along as well as can be expected.

Mrs. Herman Grabe and son Frederick of Port Allegany are guests of Mr. and Mrs. Wm. Hafner.

Frank Spangle is in Williamsport, Pa., this week.

F. H Hungiville was a business visitor in Kane Friday.

Mrs. J. Cather and Mrs. Chas. Larson were Bradford shoppers Friday.

Mr. and Mrs. Eugene McCann of Bradford were in town Friday.

Miss Alice Irons of Bradford spent the week end in town.

Mr. and Mrs. S. D. Weaver of Bradford were guests of Mr. and Mrs. H. C. Wells Sunday.

Russell Hungerford of Brockwayville spent Sunday with his family here.

Mr. and Mrs. Edward Glavin of Lancaster, Pa., were the over Sunday guests of Mr. and Mrs. Wm. Glavin.

Mr. and Mrs. Frank Dunbar of Olean, N. Y. spent Sunday with Mr. and Mrs. Geo. Gerrett of King St.

Pauline Allman and Miss Quinn spent Sunday here with friends.

Mr. Edw. Jifkins was an Olean visitor Monday.

The Bridge club had a six o'clock dinner at the Grand Central hotel, Monday and Bridge was played at the home of Mr. and Mrs. I. D. Hogarth's following the dinner.

Mr. and Mrs. Jas. Francis of Gifford, Pa., were guess of the latter's mother Mrs. Christine Anderson Thursday.

Miss Esther Swanson spent the week-end with Mr. and Mrs. Fred Youngburg of Jamestown, N. Y.

Mrs. Walter Brenneman was a Kane visitor the latter part of the week.

Miss Edith Young returned Sunday from Buffalo, N. Y., where she visited her mother who is a patient at the Women's Hospital in that city.

J. P. O'Connor of Port Allegany was a business visitor in town Friday.

Mrs. Christine Anderson and Miss Helen Anderson were the guests of Mr. and Mrs. A. H. Lyne of Bradford, Friday.

Raymond Morrison and Mr. Ertz of Bradford were in town on business Friday.

Mrs. Geo. Blaklesley of Bradford spent the week end with her parents, Mr. and Mrs. John Johnson of Water St.

Miss Iva Bacon of Punxsutawney spent the week end with her parents, Mr. and Mrs. Dan Bacon.

Mr. and Mrs. Ted Schmidt were Bradford visitors Friday.

Miss Harriet Herzog spent the week-end with Miss Helen Ford of Port Allegany.

The St. Priscilla's Guild held its regular meeting at the Parish house Monday evening and refreshments were served by Mrs. J. L. Morrison and Miss Lucile Marshall.

Mr. Ed. Laughlin of Bradford was the guest of friends here Monday.

Harold Clark returned to his home in Toronto, Ontario, Canada, Sunday after spending a few weeks with his uncle Dr. Jno Clark of this place.

Mr. and Mrs. John Pickersgill and Ted Schmidt were the guests of Mr. and Mrs. Ghordis Pickersgill of Olean Sunday.

Mrs. Josiah Howard of Emporium, Pa., was the guest of Mrs. Anson Burdick Tuesday.

Misses Edith Andrews and Leota Hovis who attend Westbrook Academy, of Oean, N. Y., spent the week-end with their parents here.

Miss Irene Gabriel and Miss Carrie McGowan were Bradford visitors Sunday.

Mr. and Mrs. Paul Apple and children of Ridgway are visiting the formers parents Mr. and Mrs. John Appel.

Mrs. D. M. Brasted was an Olean visitor Thursday.

Rev. and Mrs. W. E. VanDyke left Monday for Buffalo.

Mrs. Ed. Coleman and Mrs. Rena Balsley were Olean visitors Thursday.

Mr. and Mrs. S. D. Pierce, Mr. and Mrs. Anthony Anderson motored to Buffalo Monday.

H. M. Choate is having his residence on King street wired this week.

The Phoenix Chapter, Eastern Star Lodge will hold its installation of officers Thursday evening, March 20th.

Mrs. Nellie Bridge of Shinglehouse, teacher of Piano, expects to start a class here. She is highly recommended by the parents of former pupils.

Sheriff L. W. Barton was a Kane visitor Monday.

F. H. Hungiville was a business visitor in Kane, Monday.

Frank Whitling is visiting in Buffalo.

The U. C. Club tendered a surprise on J. Clayton Backus, Friday evening, the occasion being his birthday.

Miss Ada Studholme, entertained a number of girl friends Tuesday evening at the Star, followed by refreshments at Munn's.

E. G. Potter, district attorney, returned Tuesday night from a trip to Philadelphia and Washington. Mr. Potter was present when the bonus bill was passed by the House of Representatives.

Dr. and Mrs. John Clark returned from Buffalo Tuesday where Mrs. Clark has just bought a fine new line of Spring Millinery.

Miss Lela Hackett and Miss Leola Anderson who have been in New York City for several months returned home Monday.

Mr. and Mrs. Harold Lee spent the week-end with her parents, Mr. and Mrs. H. H. Sasse of this place.

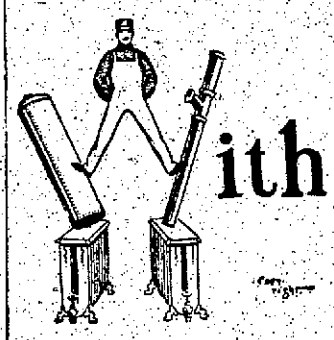
Mrs. Pauline Allman of Olean spent the week-end with her aunt Mrs. T. H. Purtle.

Miss Caroline Putnam, Crosby community nurse, was in town Wednesday.

Mr. and Mrs. John Swort of Port Allegany were Smethport visitors Monday.

Harriet Herzog spent the week-end in Port Allegany, as guest of Helen Ford.

Helen Ford, Harriet Herzog and John Malcolm attended the dance at Bradford Monday evening, given by the Bradford Seven.



With

GOOD PLUMBING TO BEGIN WITH

and your household troubles are reduced to a minimum for the whole year.

Cheap plumbing is generally poor plumbing, and stands in constant need of repairs.

Like to have householders and others test our work. New work done by our workmen will be long before it needs repairs, and repair work will almost make new plumbing of the old.

MASSER BROS.

RADIO

Many of the thousands who last year had radio sets and who were satisfied with reception by means of earphones, want to discard the phones for loud reception, and employ a loud speaker instead. In many cases, the price of the loud speakers on the market makes this prohibitive, and in other cases the person has been disgusted with loud speaker reception by the terrific grinding roars that come from some radio store loud speakers.

BY BYRT C. CALDWELL.

Of all the horns used, the phonograph horn is undoubtedly the best. The phonograph horn was developed by means of long years of painstaking research and experiment by highly paid acoustical experts. The writer has planned the horn, the description of which follows, by taking the measurements of the sound-reproducing

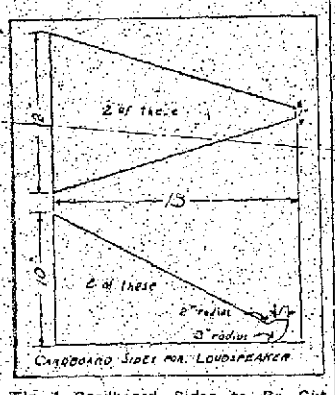

Fig. 1. Cardboard Sides to Be Cut and Used for the Construction of the Loud Speaker. Rough Cardboard Is Preferable to Bristol Board or Highly Finished Cardboard.

chamber of one of the most famous phonographs. This loud speaker is a revelation to those who have heard only the tremendous bursts of sound from the loud speakers placed in stores to sell radio. This reproducer, while it does not take a field current, employs a large magnetic magnet, which greatly increases the volume of sound.

It is said that a loud speaker does not increase the volume of sound from a given set. While this is correct, the loud speaker does not actually add to the volume, it prevents large losses from occurring, and so the volume is greater than it would be without the horn. It also directs the sound waves, and so it seems to greatly add to the volume. When the sound waves leave the receiver, they have a very great amplitude, but they cover a very small area. When they have traveled for some distance, they cover a great area, but they have a very small amplitude. It is in this change that great losses occur if no horn, or a horn of incorrect design is used.

To give best results, the horn should spread the sound waves out gradually, so that these losses are eliminated. It should also be large enough so that the fundamental of the horn is lower than any of the sounds which are liable to be reproduced. It has been found that extremely large horns, with the dimensions at the mouth approximating 8 by 8 feet, give wonderful quality results. Another requisite of the loud speaker is that the horn should be built of some homogeneous material. Thin sheet metal is unsatisfactory. The inside surface of the horn should be rough enough to absorb some of the scratchy sounds.

The loud speaker described here will cover all these points and give a wonderful quality of music and speech. It is also a beautiful instrument, as contrasted with most of the

Fig. 2. Top and Side Views of the Speaker, Showing the Location of the Loud-Speaking Unit, and the Method of Connecting It by a Flexible Rubber Tube or Hose, to Improve the Quality. The Magnet Over the Phone Gives Better Volume.

horns which we see on the market today. It is very easy to make and costs very little. These two last points perhaps are the most important to the average fan.

The container is a cabinet made with a mahogany, walnut or oak finish. It is size 16 by 12 by 10 inches and is made with a hinged cover. The front piece may have a circular, oval or square opening cut in it. This opening is covered with silk cloth of a color to harmonize with the finish of the cabinet. The horn is made in four pieces. As it is a difficult matter to cut wood into the shapes given, the pieces are cut from medium-thick, rough cardboard. This cardboard would not give satisfactory results ordinarily, but this is taken care of. When the pieces are cut out, fit them together in the shape shown, and fasten them the entire length of all the edges with sticky paper. This is then placed inside the cabinet, and glued in place. A piece of rubber tubing, with an inside diameter of one-half inch, and two feet long is fastened in the small end of the horn by pushing some paper around it and melting sealing wax over the paper. This rubber tubing can be purchased at any chemical supply store for 30 cents a foot. It is coiled up as shown, and the end is supported about three inches from the top of the cabinet and pointing up. Cement, plaster or some other such substance is now poured in to cover the horn. It should fill up all the little crevices. This is to make up for the cardboard horn, and renders it nonresonant, or practically so. The receiver should be fastened to the rubber tubing in the position shown and should preferably be of the type used for loud speaker units. It should have a large diaphragm diameter. Directly over the receiver, a strong magnet from a magneto should be fastened to the hinged cover of the cabinet. When operating, revolve the receiver until the volume is greatest. This magnet is not absolutely necessary, but it adds greatly to the volume.

This instrument may be placed in one room, and the set in another. When doing the set this way, if you first tune in with the headphones, and then attach the loud speaker, you will have to slightly reduce the condenser setting, as the tuning is changed when the set is at a distance from the re-

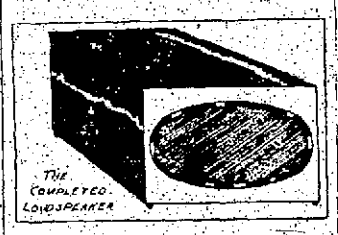

Fig. 3. Completed View of the Home-Made Loud Talker. If Placed in a Nicely Finished Cabinet and the Front Covered With Silk as Shown, a Good-Looking as Well as Extremely Serviceable Speaker Will Be the Result.

producer. Also, if you do operate the set at a distance, use two well-insulated wires to connect the set to the talker, as it is impossible to use a gas or water pipe, and if poorly insulated wires are used, a great deal of energy is lost.—Radio World.

Material Needed to Make Compact Rheostat

The materials needed to make this rheostat are a composition dial, some resistance wire, a small strip of brass, and some screws and mica disk. Wind the resistance wire on a 3-16 inch rod. When the coil is wound on, connect one end to the brass backing beside of the dial and cut the other end off about ¾ inch from the set-screw that runs from the top of the dial to the bushing. Cut out a round piece of thick mica large enough so that the wire will fit tightly on it, and then groove this mica. Cut out a hole in the center of the disk so it will fit snugly over the bushing, and drill a hole the size of this set-screw parallel with the disk. Put the set-screw in, and this will hold the disk on the dial. Punch two holes in the disk where the two ends come and connect one end to the bushing. This serves as one contact and the other contact is made by the small brass strip that is fixed on the panel.

Some Tube Problems Amateurs Will Have

Have you been confronted with a problem like this? A receiving set consists of a detector and two stages of audio frequency amplification. A UV-200 radiotron is used for the detector and two UV-201 radiotrons for the amplifier. Now, one of the UV-201 radiotrons burns out and it is replaced by a UV-201A. Which stage of the amplifier is best suited to be equipped with the latter tube? The usual practice would be to insert the new tube in the socket formerly occupied by the old tube. However, better results are obtained by placing the UV-201A in the first stage of the amplifier and the UV-201 in the second or last stage.

Increase Audibility of Signals Forty Per Cent

A new antenna cable recently developed has shown that by its use the audibility of signals can be increased by nearly 40 per cent, says the Scientific American. The conductor is composed of ten strands of No. 18 bare copper wire braided closely on a special machine to give it a ribbon-like appearance, one-half inch wide by one-eighth inch thick. With an antenna 80 feet long of this type, strung in a basement at a level about one foot below the surface of the earth, better results were obtained than with an antenna out of doors at an elevation of 40 feet.

INSTALL WORLD'S BIGGEST DYNAMO

70,000 Times as Powerful as First One Built.

This electric age is the result perhaps more than anything else of the dynamo. The history of the development of the dynamo is one of the most interesting of the romances in the field of science. Not the least of the extraordinary features associated with its development is the long sleep which followed the discovery by Faraday, England's foremost man of science in his time, of a principle not theretofore recognized, says the New York World.

In 1831 Michael Faraday, an Englishman, a pupil of Sir Humphrey Davy, while working in his laboratory engaged in experimental research, of a sudden discovered the law by means of which electricity could be created by mechanical process. Faraday made a report of his discovery and that report, of course, excited discussion, yet it was looked upon merely as an interesting discovery of a theretofore unsuspected natural law.

Future Not Foreseen.

No one at that time could see the wonderful growth in store for Faraday's little generator, or dynamo as it was then called. It was but 12 inches in diameter, most insignificant today when compared with the first of three gigantic generators just installed at the Niagara Falls power plant. Instead of 12 inches in diameter, this new Titan of Niagara has a rotor, or revolving unit, 21 feet in diameter.

Where Faraday's generator perhaps had a pull of but a fraction of one horse power, this new machine, designed and built by the General Electric company, will develop 70,000 horse power, or electricity, which, if developed through the use of coal, would require 70,000 tons annually.

Faraday's discovery slept about 30 years, although there appears to have been some crude and unsatisfactory attempts to make commercial use of it. Faraday himself made no attempt of that kind. He was purely and exclusively a man of research and science.

To Italy belongs the honor of having made such use of Faraday's discovery as to demonstrate the availability of it for creating electric energy by mechanical means. Professor Pachinotti, of one of the Italian universities, invented a machine by means of which the law that was discovered by Faraday was made commercially available.

Is Easily Obtained.

To the popular mind it is a problem to define the modern dynamo, or generator. The underlying principle is the rapid continuous change in the relative position of a lot of wires of copper and invisible magnetic lines of force. The existence of these lines of force was discovered by Faraday. The rapid whirling of the copper wires across the magnetic lines of force may be produced by a steam engine, by water power, or by any other means of effecting mechanical work.

In the dynamo electric energy is easily obtained by mechanical means. The mechanical means are represented by the rapid whirling of copper wires which are bound around a large tube or disk in such manner as to bring the wires within the lines of the magnetism. It is necessary to set up a magnet the size of which increases proportionately with the increase in the amount of electric energy desired. For the largest dynamos a very large magnet is essential.

Faraday never discovered what that mystic force which we call magnetism really is. But for that matter, as Doctor Steinmetz has often said, it can also be said of electricity itself that, while the world now understands some of the manifestations of electric energy and is able to manufacture that energy, no one has ever authoritatively stated what electricity really is.

All we know is, that Faraday's discovery of the law has made it possible to create electric energy in any amount through the operation of mechanical means. The mechanical means are themselves obtained either through the burning of coal, whereby a steam-driven engine whirls the copper wires, or by means of water power, as at the Niagara Falls electric plant.

Adequate Supply for Years.

The physical conditions existing at Niagara Falls are not duplicated elsewhere in the world. The immense drainage basin of the Great Lakes contributes an almost uniform outflow of water of such magnitude that the question of adequate supply is not one which need be considered for many years to come.

This continuous flow of over 200,000 cubic feet a second, finds its outlet through the Niagara river, which falls through a total height of 330 feet between Lakes Erie and Ontario. Of this 330 feet, 165 feet is concentrated in the cataract itself and another 55 feet is in the rapids immediately above, so that within a distance of one mile there is available a total head of 220 feet; or, combining the 94 feet of drop in the lower rapids with that above, there exists a head of 314 feet which may be developed within about five miles, distance being measured on the American side of the river.

This flow of water at the natural head available provides a source of power for over 6,000,000 horse power which, under ordinary conditions, one might expect would be used to the full for industrial purposes.

One factor alone has prevented the perfect working of economic law in this respect, and that factor is the value of the cataract and rapids from the scenic standpoint. That this value is a real one, no thoughtful person will deny. "Man cannot live by bread alone," and who can doubt that God, who, in His infinite wisdom, gave us Niagara, intended it to minister to the spirit as well as to the body of mankind?

It is just beginning to be recognized that the division must ultimately be made at that point where the sum total of human benefit shall be a maximum. And when that point is finally determined, the portion of the energy which is found not necessary to maintain the spiritual values will undoubtedly be made available for industrial purposes.

Use Niagara Power.

As early as 1725, near 200 years ago, a primitive sawmill made first use of Niagara power, and 100 years ago small waterwheels were used in mills along the upper rapids on the shore and small island of the American channel.

The beginning of the existing development may be placed as far back as 1872, when construction of a hydraulic canal was begun, extending from a point at the head of the rapids above the falls now known as Port Day, to the edge of the gorge a mile below.

In 1882, however, an installation of 15 horse power under 25-foot head was made for driving a grist mill.

It was not until 1880 that the first hydro-electric mill was installed at Niagara Falls. This comprised a waterwheel and brush dynamo and the electricity generated was used for illuminating fountains in the city's parks by means of two arc lamps. Excursions were run from various parts of the country to see the new wonder.

The second hydro-electric development and first commercial installation was made in 1895 on Bath Island. The generator of this unit with a capacity of 10 kilowatts at 110 volts was used for lighting a mill on the island. As soon as these early installations had demonstrated the possibilities of electrical power the real hydro-electric development began. This was in 1891, and there has been a gradual growth since that time.

A treaty between the United States and Canada limits the amount of water to be taken from Niagara falls for commercial purposes to 21 per cent of the total. This is now being utilized, 10 per cent on the American side and 11 per cent on the Canadian.

The demand for electricity has steadily increased, and to meet this, since no more water can be used, engineers began work on plans to use more efficiently the present water supply. Thus the idea for larger generators culminating in the world's largest machine recently installed.

More to Be Installed.

This new 70,000 horse power hydro-electric unit uses 8,000 cubic feet of water a second with an efficiency of at least 93 per cent. It does not increase the diversion of water in any way, but does materially increase the efficiency of conversion into power. It uses the same amount of water formerly used by seven 5,000 horse power units, and delivers energy equivalent to the output of 14 such units.

Two more units of the same size are being built and will be in use before the close of the year. This will add 500,000 horse power to the output of the Niagara plant without the use of any additional water, making a total output of 958,400 horse power generated by the American company, a record for hydro-electric systems in this country.

If this same amount of electricity were generated by steam it would require about 7,000,000 tons of coal a year.

The turbine of this 70,000 horse power unit is the highest power capacity water wheel ever built. It is a product of the I. P. Morris division of the Cramp Ship and Engine Building company of Philadelphia.

The water wheel is a single-piece steel casting weighing 105,000 pounds. The turbine casting and control valve required 32 carloads of parts. The turbine converts the power of the falling water into mechanical energy, which is transmitted by means of the 32-inch shaft to the generator set directly above.

The gigantic generator establishes a new high mark in design and construction of electrical equipment. The stator of the generator weighs 228 tons. The rotor with its 28 eight-ton poles weighs 399 tons. The revolving elements, consisting of rotor, shaft and runner, total approximately 500 tons and are suspended from the top of the unit by a Kingsbury thrust bearing.

One hundred and ten cars were required to transport the machinery and equipment composing this 70,000 horse power unit.

New Pressure Tunnel

The three new hydro-electric units will receive their supply of water through a new hydraulic pressure tunnel. The big tube, measuring 32 feet in diameter and 4,300 feet in length, carries the water from the head of the rapids above the falls under the city of Niagara Falls to the edge of the high cliffs below the falls.

It was excavated through solid rock and the spoil removed would fill a train of gondolas reaching from Buffalo to Utica. The tunnel discharges into a great forebay, from which the water is conducted to the turbines by means of three 21-foot slope tunnel penstocks cut through the limestone cliff.

TRYING TO SNEAK INTO U. S. RISKY

Many Killed and Robbed by Smugglers.

Pity the poor alien, who, oppressed by circumstances in his native land decides to come to America, only to find that the quota assigned his nation under the law of the United States has been filled; for of such is the horde of victims preyed upon by the alien-smugglers of Mexico, freebooters, who vie with the famous pirates in bloodthirstiness and unscrupulousness.

The alien who entrusts himself to the mercy of this crew, which agrees for a stipulated fee, to place him upon American soil, has risked not alone capture by the United States immigration officials and consequent deportation to his land of origin, but his very life thereby.

Judging by reports reaching the border from the seaports of Mexico, an eager flock of immigrants constantly floods the towns of the Mexican littoral, each anxious to invade the land of promise beyond the Rio Grande.

Operate From Tampico.

Tampico, because of its comparative nearness to the border long has been the favorite landing place for these people; similarly it has been the "bang-out" of several desperate gangs of cut-throats, masked under the guise of alien-smugglers.

The alien handing himself over to the smuggler pays high for the service that is promised, even guaranteed, but which all too often fails to be delivered. The fee is based largely upon what the immigrant may have with him. If he is incurious and displays much money, the fee will be as near the sum total as possible. Of course, there is a minimum fee and without considerable ready cash no alien could count upon starting his trek for the border.

A few, a very few, actually do reach American soil and the comparative safety of the larger cities, where, if they are lucky, they have the opportunity to hide indefinitely.

Many are caught and turned back to their lands by the American immigration authorities, but many never reach American soil, or if they do, "by love" to such good purpose that their relatives or friends, waiting anxiously in Mexico, fail ever to hear from them again.

If they go by water, launches are used in the efforts. Often their objective is the lower Texas coast, between Brownsville and Corpus Christi, where the practically deserted shore line offers excellent chance of landing without apprehension. If the alien is wise, he insists upon going ashore near Galveston, for the shores between Brownsville and Corpus Christi are sparsely populated and there is excellent chance that the alien will perish of hunger or thirst, or be compelled to go into some small town, where his appearance would lead to quick arrest.

Many Have Disappeared.

Once they pass Galveston and reach Houston, and lie low for a time, they have a chance to enter the interior through the machinations of an "underground railroad" declared by immigration authorities to be operated from headquarters in New York, Philadelphia, Boston, Chicago, St. Louis and other large cities of the East and Middle West. A few even are sent to the Pacific coast, it is said, but not many.

At times launch loads of would-be entrants, and particularly Chinese, have disappeared. The smugglers returning have maintained stoutly that they landed the men on the Texas coast and left them there as they had agreed. But, waiting friends or relatives never received word from the men and feared the worst.

The regularity of disappearance of aliens who, singly or in small groups, tried to run the international boundary guard long ago led to suspicion of foul play. This was clinched to certainty when a few months ago a party of six Italians was set upon by the Mexicans who had been hired to smuggle them across the Rio Grande. Five died, while the sixth, aided by darkness, escaped. Two Mexicans were executed by a firing squad for this murder.

Mrs. Tony Spadafore spent a few days with her parents, at Crosby, Mr. and Mrs. Smith.

THE SPENDTHRIFTS

By DOUGLAS MALLOCH

THE fools are not the ones who haste
To spend what they possess;
The fools alone the ones who waste
Their hours in idleness.
These are the spendthrifts: they who throw
Away some wealth that now they know,
Some golden wealth they might retain,
Some wealth they never can regain.

These are the spendthrifts; they who spend
The riches doubly dear,
The good opinion of a friend,
The love of some one near,
A spotless life, an honored name,
Exchanged for folly, sold for shame—
These are the fools, who throw away
The simple things of every day.

Oh, better lose the gold you own
Than lose the hearts you hold;
The wealth for which a man is known
Is not his wealth of gold.
It is the wealth you need not lose,
To keep forever, if you choose,
The faith of friend, the love of wife,
An honored name, a spotless life.

BETTER HOME EXHIBIT AT BRADFORD, MARCH 26 to 29.

The ladies's and Home Furnishers of the Bradford Board of Commerce are going to put on an Educational Exhibit of the many things that go to make a comfortable and beautiful Home. They realize that the character of the people is largely effected by the homes in which they dwell and that the home should always be a fitting symbol of the ideals and aspirations of the family which it shelters. High civilization has been built by nations in which the masses of the population are home-lovers.

High standards are consistent with economy and can be put within reach of all. Everyone wants to have a decent and healthful home; they want them attractive and beautiful; reducing the drudgery, making the best use of the devices which modern civilization matters settled up at once.

have placed at their doors but the

great difficulty has been in making the selection, therefore, a well directed and concentrated effort is to be made to work out the solution of this perplexing problem.

You are invited to visit this Exhibit and learn at first hand just what you can do to go into the making of the home or its furnishings. There will be actual displays of the most economical and the most modern building material and furnishings to look at. The purpose is purely educational.

NOTICE

All persons having bills against the undersigned please present same at once for payment, also those owing me accounts are requested to settle as soon as possible as I wish to get all business

ady 2t GEO. H. DENNING.

BUY AT HOME.

Because no community can be built up without the patronage of its citizens.

Because the upbuilding and progress of your town depends more on the home merchant than upon all other sources.

Because as a loyal citizen you should at least contribute your patronage to your home merchants as a means of helping to build a more prosperous town.

Because the dollar you send away from home is virtually certain never to return to you, even in part, and the dollar you spend at home may come back to you with big interest added.

Because the out-of-town merchant contributes nothing towards better schools, churches, paved streets, and all the conveniences of the modern city, and without the home merchant you could enjoy none of these.

Because the home merchant can serve you more quickly and better, and can give you exactly the kind of goods you want at as good or better prices than can any distant mail order house.

Because you come in personal touch with your home merchant who understands your personal problems, and often is able to assist you in emergencies, whereas you never ask or receive favors from outside concerns, and finally.

Because your home merchant is your neighbor and fellow-townsman with whom you can discuss and work out community problems, and thus by co-operating with him help to make your town a better and more prosperous city that will attract other good citizens to it, to your advantage as well as his.

INFANT MORTALITY FOR McKEAN COUNTY IS LOW STATE'S SURVEY SHOW

High infant mortality rates follow closely upon high birth rates. Illiteracy and foreign born population in the 67 counties of Pennsylvania, according to charts prepared by Dr. Charles H. Miner, commissioner of public health. The charts, covering a five year period from 1918 to 1922 show that those counties which have the high infant mortality also have the largest number of births, illiterates, and foreigners.

Industrial sections of the state, having a large number of foreign workers, invariably have the large infant mortality rate while the agricultural counties escape the blight of the heavy death rates among the children under one year.

The court shows that while McKean county is among those having the lowest mortality rates under 80— for the five years record, it also has the lowest birth rate under 21. This compares with an average of 28.3 for the entire state. This is due to the comparatively few foreign born residents of the county, which are estimated at between 10 and 15 per cent of the county's population.

McKean county also is numbered among those having the fewest illiterates in the state, less than two per cent of the population over 10 years of age being unable to read or write in any language.

This county ranks 56th in the list of infant mortality with 71. Fayette county leads the list with 119 while Union county has the lowest rate—54. McKean is tied for 56th place with Clarion county which also has a rate of 71.—Era, March 12.

PRESTO-O-LITE DISTRIBUTORS.

We 23,000 Men
Present you the utmost in fine cars

THERE are 23,000 of us building Studebaker cars. Most of us are partners in the business. Thousands of us are stockholders. All of us, after a certain time, get dividends on wages.

All of us, after two years, get vacations with pay. All of us, after one year, get dividends on wages. After five years, that annual dividend adds 10% to our earnings.

The company spends vast sums on co-operative work with us. When we retire, we get pensions.

So Studebaker cars represent the best that we, in combination, know how to offer you.

* * *

Some of us belong to management. If we do better than expected, we get 10% of the excess.

So every man among us does his best to make Studebaker cars supreme.

Our fine backing

Behind us is an honored name. For 72 years Studebaker has been the leader in quality and class.

We have $90,000,000 of assets. We have $50,000,000 in model plants. We have 12,500 up-to-date machines. So Studebaker cars are built by modern and efficient methods.

We have an engineering department which costs $500,000 yearly. That to maintain and develop Studebaker standards.

We subject Studebaker cars to 30,000 inspections. That requires 1,200 men. All told over 70,000 machine and hand operations are performed in manufacture of a Studebaker car. In so many operations, though each one is small, there is a great opportunity for economies and savings.

We have a $10,000,000 body plant, to maintain the Studebaker standard of coach work. There sons, fathers and grandfathers are working together, to build such bodies as Studebaker always built.

These bodies are finished by many operations, including 15 coats of paint and varnish.

The open bodies are upholstered in real leather. The closed bodies in Chase Mohair. That is made from the silky fleece of Angora goats.

We pay for those extras — and others—out of savings. Building our own bodies saves you on some types up to $300 per car.

We never stint

The rule here is to give the utmost in every part and detail.

We have 35 formulas for steel. Each has been demonstrated best for its purpose. On some of these steels we pay 15% premium to get the formulas exact.

All Studebaker models are equipped with Timken bearings. There are few cars in America, regardless of price, which equal ours on this point. In our Light-Six, for instance, we put more Timken bearings than are used in any competitive car, within $1,500 of its price.

We give unusual equipment. On some Big-Six models, for instance, we include two nickel-plated bumpers, one or two extra disc wheels with cord tires, a courtesy light, a motometer, steel trunk, etc.

How we do this

We give you these extra values through quantity production. We build 150,000 cars per year — more than any other fine-car builder. Our large expenses are divided by that enormous output.

We do it by building our own bodies, our own parts. Thus we save outside profits.

We do it because we have up-to-date plants, with all forms of modern equipment.

* * *

The results are these: Beauty, quality and luxury such as no maker can surpass.

Prices far below the usual. Our Light-Six, built by ordinary methods, would sell for from $200 to $400 more. Our Big-Six can be compared only with the highest-priced cars in the world.

Here are 13 models, from $1,025 to $2,685. Each of them offers scores of advantages over any comparable car. They offer such values that the trend toward Studebakers has become overwhelming.

Go analyze the reasons before you buy a quality car.

See how Studebaker gained top place

145,167 people last year paid $201,000,000 for Studebaker cars.

The sales have almost trebled in the past three years. Studebaker growth in fine cars is the marvel of this industry.

Go see the reasons. See the scores of extra values Studebaker offers.

There are 13 models. Prices start at $1025. They go to the highest price a fine car needs to cost.

Don't buy a car for years to come without knowing how Studebaker gained its amazing popularity.
